

Product Information Sheet

SoyGreen® CLEANER & DEGREASER

Description

SoyGreen® Cleaner & Degreaser (formerly SoyFast™ All Purpose Cleaner) is a 'green' all purpose cleaner sold in RTU concentrates that can be further diluted, and in super concentrates that can be diluted up to 1:300. SoyGreen® is a clear, soy-based, non-toxic, biodegradable formula with incredible grease cutting power, yet contains no butyls, abrasives or strong alkalines. SoyGreen® Cleaner & Degreaser is ideal for industrial, automotive, marine and commercial cleaning operations, including mixing stations.

Available in RTU quarts (6 x 32 oz.), gallons (4 x 1), and 5 gallon pails; super-concentrates available in 5-gal pails, 55-gal drums, and totes.

Directions

SoyGreen® Cleaner & Degreaser is designed to be a RTU concentrate or diluted with water depending on the application. For heavy cleaning and degreasing, use full strength or dilute up to 1:10; for light cleaning, dilute up to 1:30. Always test surfaces for color fastness and material compatibility, especially plastics and dyed materials. SoyGreen® is completely safe for cleaning and degreasing applications on aluminum, finished and unfinished wood, painted surfaces, vinyl flooring, grill hoods, automotive and fleet finishes including wheels. Apply SoyGreen® with a sprayer, mop or brush and allow to dwell for 1 to 2 minutes. Heavy grease and grime may require additional scrubbing. Rinse or wipe clean. When cleaning fabrics or upholstery, avoid overuse, rinse and blot dry. Repeat if necessary. Use carefully on carpet or flooring, and only for areas heavy with grease; all areas on carpet and flooring must be extracted with hot water and thoroughly dried. Avoid freezing conditions.

Safety Data (see SDS for additional information)

GHS (US):

Warning: Eye irritant (Super-concentrate only)

First Aid:

Eyes: Flush with water for 15 minutes. If irritation continues, call a physician.

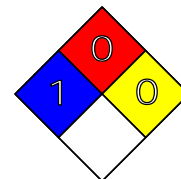

Ingestion: Seek medical attention.

Keep out of reach of children.

Technical Data

Type: Micro Emulsion
Appearance: Clear-Light Yellow Liquid
Scent: Mild Citrus
pH @ 1% Solution: 9.0-9.5
Flash Point: n/a (none to boiling point)

Boiling Point: 212°F
Melting Point: 30°F
Specific Gravity: 1.00
VOC Percentage: <0.5%
(Method 310)

*VOC Compliant
