

Company Overview

Soy Technologies, LLC is a privately owned specialty chemical manufacturer based in Nicholasville, Kentucky, just south of Lexington. One of the original pioneers of soy-based chemistry, the company develops and markets environmentally safe chemicals and products to industrial distributors and manufacturers. Products are sold via company brands along with a specialty in private label programs. With ISO 9002/14001 certified manufacturing facilities and warehousing in Florence, Kentucky, the company is ideally located in the Midwest for cost effective distribution in the U. S., and with a product line consisting exclusively of non-hazardous and non-flammable chemicals, the company exports a wide range of products to international markets with no DOT restrictions.

Company Background

Soy Technologies was founded in early 2001 in Delray Beach, Florida, as a "think tank" to investigate the market potential and subsequent development of alternative solvents...environmentally safe alternatives to petroleum products and bi-products. Soy was selected as the primary active ingredient in that it is largely a U.S. produced renewable resource, has greater price stability than traditional petrochemical alternatives and other feedstock alternative solvents such as corn, and most importantly, has exceptional chemical qualities.

After successfully developing a core set of chemistry, the company was purchased by an investment group in June/2003 to then bring those products to market and continue R&D efforts. In Jan/2005, operations were relocated to the Cincinnati/Lexington area, and a robust supply chain network ideally located in the Midwest was created.

Now, with over \$3 million and more than ten years invested in the research and development of solvent and emulsion chemistry, Soy Technologies is one of the premier companies in the industry developing soy-based chemistry in selected markets. By offering intermediary blends and finished products, house brands and private label, and small packaging and bulk, the company is ideally suited to sell products to companies focused on the health of their employees and their customers, with a focus on environmentally responsible products.

Target Markets

Soy Technologies markets products to industrial distributors, manufacturers, industrial users and government entities. Target markets include the following:

- Jan/San & Foodservice Distribution
- Retail (private label only)
- Green Additives to Paints & Coatings
- Cosmetics & Personal Care
- Artist Paint Thinners via Distribution
- Exports in International Markets

Soy Technologies, LLC

Product Overview

SoyGreen® Cleaners, Degreasers & Strippers

SoyGreen® solvents are unique soy-based blends, effective for a variety of applications, and available in a liquid and gel (thickened) viscosities as well as solvent and emulsion blends. Formulated to replace many common terpene and petrochemical based products, SoyGreen® is completely environmentally safe by any definition – low VOC's, bio-based, readily biodegradable, non-flammable, and with the exception of the most aggressive Paint Strippers, all GHS (US) - Not Classified.

| SG1000/SG1000E | Solvent | Emulsion |
|----------------------------------|---------|----------|
| Stainless Steel Cleaner/Polish | • | |
| Spray n Shine Cleaner | | • |
| Hard Surface Cleaner | | • |
| SG1000E Concentrates | | • |
| SG5000/SG5000E | | |
| Mastic & Adhesive Remover-Liquid | • | |
| Parts Washing | • | |
| White Board Cleaner | | • |
| Light Graffiti Remover (Good) | | • |

| SG6000 | Solvent | Emulsion |
|-----------------------------------|---------|----------|
| Graffiti Remover (Better) | • | |
| Mastic & Adhesive Remover-Gel | • | |
| Paint Overspray Remover | • | |
| Gel Version of SG5000 Chemistry | • | |
| SG PolyStripper | | |
| Graffiti Remover for Retail | • | |
| Paint Stripper for Retail | • | |
| Liquid Version - SG PolyClear | • | |
| Less Aggressive than SG EnviroGel | • | |

| SG EnviroGel | Solvent | Emulsion |
|----------------------------------|---------|----------|
| Graffiti Remover (Best) | • | |
| Paint Stripper (Best) | • | |
| Terrazzo Tile & Grout Stripper | • | |
| Liquid Version - SG EnviroClear | • | |
| SG Cleaner & Degreaser | | |
| All Purpose Cleaner & Degreaser | | • |
| Light Degreaser | | • |
| Super-Concentrates (up to 1:300) | | • |
| Carrier for Custom Blends | | • |

Soyanol™ Green Additives for Paints and Coatings

Soyanol™ is the company's brand for an innovative product line of soy-based additives designed to enhance performance, reduce VOC content, and eliminate phthalate based plasticizers. Soyanol™ provides today's coatings formulators with a powerful new set of tools to formulate low VOC solvent and water borne coatings. Applications include coalescent, plasticizer, and solvent replacement. All Soyanol™ blends are GHS (US) - Not Classified, with no warnings, cautions or pictograms.

| Soyanol™ | Solvent | Emulsion |
|-----------------|---------|----------|
| Soyanol™ SGE40 | | • |
| Soyanol™ 1000EX | • | |
| Soyanol™ 1000E | | • |
| Soyanol™ 5000E | | • |

| Soyanol™ | Solvent | Emulsion |
|-------------------|---------|----------|
| Soyanol™ 5000X-ES | • | |
| Soyanol™ 5000X-HS | • | |
| Soyanol™ 5000X | • | |
| Soyanol™ 5000X-TB | • | |

SoyLux™ Cosmetics & Personal Care

SoyLux™ Skin and Nail Care is an innovative plant based product line designed to highlight the benefits of health and environmentally responsible products in the cosmetics and personal care industry. With a unique blend of vitamins A, C, & E, SoyLux™ is designed to moisturize and penetrate cuticles and nails, and eliminate or reduce the need for acetone. While available via private label for over 7 years now, a line of SoyLux™ branded products was introduced in 2015 for the professional salon market, beauty schools and retail.

SoyThin™ Artist Paint Thinners

SoyThin™ Odorless Paint Thinner is the company's newest brand sold as retail and to artist supply houses. As an odorless, clear mixture of petroleum distillates, highly refined by soy additives, SoyThin™ offers a stronger thinner with less hazardous vapors than traditional mineral spirit based thinners.

Specialty Products

Soy Technologies is constantly coming up with new products and new chemistry, some by design and some...by accident. With 10 years of R&D on soy based chemistry, we are in an ideal position to offer our formulation services for custom blends and ownership based formulas. Just one example of a formula developed and available is a biobased chain oil lubricant.

All projects to be considered on a case by case basis, with scope of work and fees agreed up front.
